

DR. BRADLEY BENGTON**WHAT ATTRACTED YOU TO PLASTIC SURGERY**

It provides a mix of compassion, science, art and creativity

FAVORITE PART OF YOUR JOB

It's an incredibly gratifying gift when patients entrust you with their bodies and their lives. Earning their trust and obtain-

ing a safe, beautiful result is what makes my job so rewarding

HOBBIES Photography**PRO BONO WORK** I've performed medical missions in Albania a handful of times**HOW DO YOU START EACH DAY** I wake up thankful for every breath and every heartbeat**RESTORE, REFINE, RENEW™**

Dedicating half of his practice to breast-related surgeries, Dr. Bengtson has adopted a new, **STATE-OF-THE-ART SOFTWARE PROGRAM** to help patients more accurately visualize their anticipated breast augmentation results.

"Gone are the days of before-and-after photos in my practice. Instead, I show patients what their results may look like. They can virtually try on different implant styles and sizes to preview potential outcomes. Integrated into the consultation process, our Vectra® 3D Imaging System will model individual patient outcomes, making our time together more interactive and educational." Dr. Bengtson also uses this technology for patients seeking facial rejuvenation. "It really helps to manage patient expectations. Together the patient and I can discuss the specific enhancements they are looking for and what range is possible. The results are very accurate," says Dr. Bengtson, who is a **NATIONAL TRAINER** for Botox® and Juvéderm®. Dr. Bengtson is actively involved with many research projects of the face, breast and body to help bring new, innovative products to the market. "After meeting with our team, my main goal is for all of our patients to feel confident and comfortable with the safe surgical and nonsurgical solutions we have customized for them."

INSIDE INFORMATION

visualizing your results

Just over a year ago, Dr. Bradley Bengtson made a decision that forever changed his life—he decided to strike out on his own. "I had a dream and vision of what I wanted my practice to be like. I envisioned creating something I had never seen or experienced before—a five-star center of excellence and service for concierge rejuvenation," he says. Today, that dream is a reality at the Bengtson Center for Aesthetics and Plastic Surgery.

Nestled on the first floor of a comprehensive women's health center crafted by Dr. Bengtson, a creative design team and a residential builder, his all-inclusive cosmetic center is a haven for renewal, relaxation and rejuvenation, resembling a cozy, welcoming home. "The space consists of a fireplace and reading nook to provide an intimate residential ambience," says Dr. Bengtson, who stresses patient service as his primary focus. "Upon entering, patients are greeted by a concierge, as if they're entering a Four Seasons or a warm residence. Depending on their needs, they are then directed to our skin care, injectable or plastic surgery center to ensure complete privacy." Patients are also privy to a skin-care bar, online patient scheduling and post-surgical entrance for privacy. Patients can expect individualized service and care that echo the patient-centric focus employed by Dr. Bengtson and his staff. In addition, Dr. Bengtson was elected by his peers for inclusion in Best Doctors in America® from 1996 to 2010. The author of over 20 peer-reviewed articles, as well as 10 books and chapters, and having delivered over 100 national and international presentations, Dr. Bengtson is a true leader, making him well-apt to create the natural-looking facial, breast and body results he performs daily. "It is such a pleasure and privilege to see my vision come to life. Our team looks forward to providing distinctive care and experiences for our patients, their families and our community."
